What is ISportsWall?

ISportsWall is an innovative new development from Amazing Interactives Ltd that makes a large 5/6m wall within a school hall Interactive. It has over 30 modules covering both educational and physical activities. The system then allows pupils to interact with the modules by throwing balls or touching the wall.

ISportsWall includes a range of educational and physical modules covering Maths, English, Science, History and Geography. The system also includes modules that allow the teacher to create their own questions and answers. It also allows them to create bespoke image puzzles by uploading their own pictures. Games are configurable allowing the teacher to set number of teams, time and the target age group.

Advantages of using ISportsWall

- Fits within the sports premium funding model and helps deliver those objectives.
- Stimulates pupils both physically and mentally.
- Makes learning maths, science, history and geography fun whilst exercising.
- Helps periodic retrieval of learning that strengthens connections to the memory.
- Stimulates physical effort through competitive fun based exercise.
- Can be used as a reward based activity for good behaviour.
- Can support children with challenging behaviour by stimulating them to learn.
- Can be used as a fun activity at break times or in after school clubs.

ISportsWall is easy to use and has both automatic and manual calibration for the wall tracking. The whole system is operated from a small wireless rechargeable keyboard, which is used to select and configure the games. The system also includes a 4 light RGB bar that creates lighting effects during game play. An extra wall input is also installed that allows the projection and sound system to be used for normal presentations from a laptop.

Whats included in the System

- 6000 ansi-lumen Laser WUXGA projector + cage and ceiling mount.
- 1 MP time of flight depth and Infrared camera.
- Camera cage and ceiling mount.
- Mini VR PC to drive system with high end graphics.
- Stereo Sound system using active 800 watt speakers.
- An all-in-one lighting system with 4 powerful RGB lights.
- Rechargeable wireless keyboard and mouse.
- USB to DMX lighting controller.
- Projection wall controller to switch system on/off and switch inputs.
- HDMI/Audio wall plate and all video and audio cabling.
